## Word-of-the-Week activities to build vocabulary

This word-of-the-week resource was designed to help build vocabulary throughout the year. There are enough words (40) for teachers to choose one word to use per week. There is a clue to display for each day of the week (Monday-Friday). Clues may be displayed electronically on the board or teachers may want to print and display one per day on a bulletin board. This can be done using page protectors or to save space, laminate and attach to a metal ring that will allow you to flip daily to view the new clue.

## Word-of-the-Week activities to build vocabulary

After displaying the day's clues, have students make as many guesses as possible. A recording page is included for this but once the students get the hang of it, teachers may have them "draw" this page in a journal to save on copies.

The clues start out very general so there should be lots of guesses the first couple of days. Once the clues become more specific, students should be able to narrow their lists and/or change their choices to become more accurate.

## Word-of-the-Week activities to build vocabulary

A page of Word Superstar badges is included at the end of this pack. These badges may be used to reward students for correctly figuring out words.

Black and white badges may be copied, cut apart, and given to students to color and glue onto their word journals. Or colored badges may be cut out laminated and given to students to wear on a necklace (chain or string). Just punch a hole in the top!
